

THE JOURNEY OF LIFE TOWARDS EXPLORING THE INNERSELF.

Army Institute of Management and Technology had organized a Guest Lecture on the 12th of March at 15:30 hours in the Seminar Hall the speaker for the lecture was Mr. Aseem Chawla, a young and dynamic Mechanical Engineer from Vellore Institute of Technology with 7 years of work experience. He's the Associate Vice President at Kaizen Metal Forming Pvt. Ltd.

Dr. Rana Singh, Director of Army Institute of Management and Technology felicitated the honorable Guest Lecturer Mr. Aseem Chawla. Shefali Tyagi and Sakshi Pal, students of MBA 1st year introduced the speaker to the audience.

Mr. Chawla made sure during the session that it stays interactive and shared his real life familiarities. He started with his journey of travelling across the globe. He even questioned the audience about the importance of travelling. He updated the audience about the first day of his travelling schedule when he left for Thailand .He quoted what he learnt during his enriching trip that- everything in life is not monochrome and he stated that one really doesn't need a lot amount of money to travel. He then continued telling the audience about his next destinations and his travelling adventures. In Indonesia he taught underprivileged girls and realized money is not the sole purpose of living life. After that in Taiwan he took a stand for the rights for children and collected money to eradicate child labour.He said he's on the verge of writing a book on his travelling experience. At the end he spoke about his journey in Maruti Suzuki India Ltd as a Deputy Manager and how he inculcated the learning in him that one should first work for their own benefit and then the organization.

The session ended with students asking queries related to the importance of travelling and finding motivation to keep working towards ones goal.

Our Director Dr. Rana Singh presented the Vote of Thanks to our lecturer at the end. Overall it was a brilliant session where the students were fostered and their minds were stimulated with positivity and growth.
