

ARMY INSTITUTE OF MANAGEMENT & TECHNOLOGY, GREATER NOIDA

Student Satisfaction Survey 2018- 19

Army Institute of Management & Technology, Greater Noida implemented Student Satisfaction Survey as per the instruction of NAAC from the year 2018- 19. This survey has been conducted through structured questionnaire. This structured questionnaire was distributed among the students and collected from them without any pressure.

The observations/ outcomes of the survey are as follows:

Students are satisfied with the completion of syllabus, preparation of teachers, approach and communication of teachers. Students are also happy with the teaching style which includes illustrative and live examples.

Moreover, students have shown satisfaction regarding fairness in case of internal evaluation, discussion of performance in the assignments, mentorship and application-based teaching.

As all the teachers are teaching ITC based, teaching- learning process has become more and more effective.

Apart from these, students are encouraged for participating in extra- curricular and co- curricular activities, also institute is focusing on the enhancement of soft- skill development of students.

However, these are our strong points in the students' satisfaction survey. Through teaching and learning, we have found some grey areas as follows:

Students are interested in student exchange programmes, so that multiple learning opportunities may get available for them.

Moreover, there is need for improvement regarding identification of strengths and weaknesses of students and encouraging and guiding regarding the same for further development.
